Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed peaks of claim 1 in the Shenoy reference and in applicant's invention. Applicant's stated that in their invention, peaks from the STC plane are sorted, whereas they perceived the Shenoy reference as dealing with waveform peaks. Applicant's discussed that their invention changes a high frequency to allow frequency that allows decimation and compression of data. Discussed removing the filtering limitation of claim 1, and adding parts of the second limitation of the claim into the limitation in the first line of the claim since the filtering was stated as being optional and not required in the specification. .
